PRE-PHYSICAL THERAPY

Our Promise to You
Wesleyan prepares students seeking admission to physical therapy school. You may major in any academic area, though most students major in biology, chemistry or both. You will receive personalized guidance from a faculty advisor as they guide you in a rigorous academic setting and help you meet your goals.

Exceptional Preparation
As a Kentucky Wesleyan student, you will complete a B.S. or B.A. degree at Wesleyan and then apply to a physical therapy program.

Many of our graduates have attended the University of Kentucky, Southern Indiana University and Bellarmine University among others.

Get Involved
The Pre-Professional Society is for science majors with career goals in medicine, veterinary, optometry, nursing or pharmacology. Monthly meetings provide opportunities to speak with physicians and alumni.

Research Opportunities
We encourage our students to engage in summer research programs. Our students have participated in research activities at universities across the South and Midwest and at Oak Ridge National Laboratories.

For more information about the pre-physical therapy program, contact Dr. W.L. Magnuson at magnuson@kwc.edu
